Certificates

AWS Certified Cloud Practitioner Certificate

AWS

US Embassy Customer Service and Diplomatic Technology Certificate

US Embassy

Mastering React: Certificate of Completion

Udemy

Summary

Innovative and detail-oriented software developer with hands-on experience in building scalable, high-performance web and mobile applications using React, Node.js, Express, MongoDB, AWS, and GraphQL. Proven ability to work on production-grade systems, collaborate within existing codebases, and deliver maintainable, high-performance solutions that solve real-world problems. Passionate about delivering high-quality software through clean architecture, optimized performance, and collaborative teamwork.

Technical Skills

Frontend Development

React, React Native, TypeScript, Redux Toolkit, Tailwind CSS, Framer Motion, GSAP, Vite

Backend & APIs

Node.js, Express.js, REST APIs, GraphQL, JWT Authentication

Databases & Cloud

MongoDB, Firebase, AWS Lambda, Cloudinary

DevOps & Tools

Git/GitHub, Postman, AWS (Cloud Practitioner), CI-friendly project structuring

Professional Skills

Problem Solving, Team Collaboration, Technical Documentation, Communication

Experience

IT Support Intern

US Embassy (08/2024 – 09/2024)

- Monitored and maintained network performance, troubleshooting connectivity issues.
 - Contributed to the creation and maintenance of IT documentation and user guides.
 - Updated customer records in databases ensuring accuracy of information.
 - Maintained office supplies inventory by checking stock to determine inventory level; anticipating needed supplies; placing orders for supplies; verifying receipt of supplies.
-

Projects

NexusTrack (formerly CargoTrack) – Logistics Tracking SaaS Platform (Full Stack Development)

- Architected a 3-tier shipment tracking system (China origin, sea transit, and Ghana customs/last-mile) for a logistics SaaS serving partner companies and their clients.
- Built backend on Node.js/Express and Supabase (PostgreSQL) with Redis/BullMQ job queues; React frontend with Zustand, deployed via Railway and Vercel.
- Conducted a security audit and remediated critical vulnerabilities, including an insecure auth secret fallback, missing rate limiting on OTP endpoints, and unenforced admin-only routes.
- Designed a cost-efficient integration strategy around third-party API constraints and built an Agent Portal workflow to solve for Ghana Customs' lack of a public API.

OFFRS Cafe – Full-Stack Progressive Web App (Solo Developer)

- Built and shipped a production PWA and responsive website for a café/boba business using React 19, TypeScript, Vite, Node.js/Express, and MongoDB.

- Engineered service worker caching strategies enabling automatic background updates without user-triggered reinstalls.
- Implemented role-based dashboards (Admin, Sub-Admin, Rider, Employee), Stripe payments, real-time GPS order tracking, and Firebase push notifications.
- Solved cross-platform compatibility issues across iOS/Android WebViews and in-app browsers (Facebook, Instagram, Line).

AutoHub – Automotive Marketplace & Vehicle Management App (Full Stack Development)

- Developed a mobile-first marketplace (React Native/Expo) supporting vehicle buying/selling, trading, auto parts e-commerce, rentals, and mechanic discovery.
- Built real-time mechanic discovery using MongoDB geo-spatial queries and Socket.IO, plus an OBD-II diagnostics simulator integrating NHTSA VIN and recall data.
- Implemented multi-provider authentication (Google, Apple, email) and role-based access control across user, vendor, mechanic, and admin roles.

Dreamland Animation Platform (Ongoing –Full Stack)

- Contributing to a large-scale monorepo React + TypeScript application using Vite, GraphQL (Apollo), and TanStack Query.
- Working within an existing production architecture, collaborating with a distributed team.
- Integrating GraphQL APIs, managing server state, and optimizing frontend performance.
- Following Agile workflows, clean code practices, and scalable component design.
- Gaining hands-on experience with AWS-backed infrastructure and secure environment configuration.

Fashion E-commerce Site (Full Stack Development)

- Built a complete shopping and admin management platform using React, Redux Toolkit, Node.js, and MongoDB.
- Implemented product management, cart functionality, and Cloudinary-based image uploads.
- Developed secure user authentication and admin dashboard for product analytics.

Laundry App (Full Stack Development)

- Designed and developed a React Native app for laundry services with login and personalized dashboard.
- Integrated order management, service selection counters, and Framer Motion animations.
- Connected to Express.js backend and MongoDB for order and user data storage.

Language Learning, Flashcard and Fitness Tracking Apps (Mobile App Development)

- Created an interactive React Native language learning app featuring progress tracking and goal-setting features.
- Integrated Firebase for authentication and real-time data updates.
- Implemented responsive UI with carousel sliders and animated stat cards.

Church Engagement App (Mobile App Development)

- Built a mobile-first React Native church app integrated with Firebase backend.
- Implemented event listings, daily devotionals, and user-friendly navigation flow.

Education and Training

University of Ghana

Bachelor of Science in Physics with Computer Science (01/2021 – 09/2025)

Presbyterian Boys Senior High School
